Brand: Zero
Code: C5716

\$665.30 +GST \$765.10 incl. GST

Description

ZERO Controlled Rate Descender for 11mm Static Rope YIE-003 RED000R

The Controlled Rate Descender is an evacuation device by which a person, fitted in a full arrest harness, can descend on their own from higher position to lower position. For self evacuation or recovery of a casualty from tall structures. The descent speed is automatically limited during descent. This product is intended for one person use only.

Installation requires an anchor point meeting the standard AS/NZS 1891.4. Its resistance shall exceed 15kN. It shall be positioned above the user.

Features

- For polyamide rope diameter 11mm.
- Rope needs to be ordered separately.
- Descent speed: 0.8m - 1.5m / sec.
- Minimum load: 20kg.
- Maximum load: 150kg.
- Recommended maximum lifetime: 6 years.
