### Description

Klingspor SMT924 Ceramic Flap Disc 125mm

The SMT 924 Special abrasive mop disc is a hard-working specialist that is sure to complete work on edges with utmost precision. Exceedingly powerful and remarkably durable the SMT 924 abrasive mop disc has been designed for processing stainless steel & steel.

The SMT 924 Special abrasive mop disc owes its unmatched aggressiveness and exceptional speed of stock removal -to its ceramic aluminium oxide grain. This synthetic crystal is both remarkably hard and extremely tough, which makes the material resistant to breakage and tearing. Sharp-edged and pointy, the grain has little wear and is self-sharpening. This ultra-efficient abrasive grain allows for work on edges with impeccable results.
