Description

Prostop Paper Joint Tape

Prostop® Premium Paper Joint Tape is a durable paper tape designed to reinforce joints and corners in gypsum drywall interiors. It is also recommended for joint treatment in veneer finish systems that dry quickly and have framing exceeding 406 mm spacing. The tape resists cracking and stretching and is lightly sanded to increase bond strength. Its special cross-fibered tape with high tensile strength makes it ideal for joint reinforcement.

Prostop® Paper Tape's high porosity ensures a strong bond without the need for perforations and provides exceptional wet strength. Prostop® lies flat and resists tearing under tools, and its positive center creasing and uniform winding make it easy to apply accurately to angles and flat joints.
