Brand: Bora
Code: C4190-2A

\$164.00 +GST \$188.60 incl. GST

Description

BORA Adjustable Speedhorse XT Saw Horse

Features & Benefits

- Legs are independently adjustable in 1" increments. Adjust the height of your Speedhorse XT anywhere from 762mm to 914mm.
- Compensate for uneven terrain on the jobsite by extending each leg to the height you need.
- Get instant setup with the pull of a lever and the easy teardown you love with the Speedhorse! Just readjust the legs back to 30" to fold back into the sawhorse.
- Each individual unit can support 680kg – 90kg. more than the leading competitors.
- Non-sequential leg folding, pre-drilled top, and end slots for 2x material are all here, ready to help you work!

Wherever you are, whatever you're working on, you need equipment that's heavy-duty, simple to set up and tear down, and easy on your back.

With the PM-4550 Speedhorse XT, you finally have a sawhorse that does all three.

We took our bestselling PM-4500 Speedhorse sawhorse and gave it individually extendable legs — meaning you can raise your Speedhorse XT to the height you need. Adjust the height from 762mm to 914mm. Plus, you can adjust each leg to different heights to make up for uneven ground.

Get yourself a sawhorse that can keep up with you. Get yourself a Speedhorse XT.
