Description

INTEX Heritage Trowel Stainless Steel Cork Handle

Hand-finished trowel of the highest quality, designed to satisfy the most demanding professional. The blade is hardened and tempered, made from ultra-fine INOX stainless steel, with the underside transverse ground, providing a smooth surface for superior finishing. Highest grade steel contains chromium with 1% molybdenum resulting in enhanced strength, flexibility, wear-resistance and provides permanent precision. Hand-finished chamfered edges, pre-broken in shape and polished immediately ensure optimum finishing. Lightweight, sandblasted diecast aluminium mounding is fixed with medium 10 stainless steel welded bracket studs (depending on trowel length) and resilient up to 80kg. The bolted handle is positioned for perfect balance.
