ZERO Rescue Stretcher Kit DX-020

Rescue stretcher is specially designed for use in confined spaces with limited access. Their lightweight design enables usage in rescue operations at height, operations with helicopter, water rescue operations and military operations thanks to its versatility and ease of use. Compact for transport and storage, the stretchers is rolled to fit into the backpack. When assembled the stretcher has rigid strength giving excellent support to the casualty. The sled shape helps the stretcher to slide any rough terrain in demanding rescue operations.

Features

- Antibacterial use
