C6755	L-XXL	\$299.00

Description

CAMP GT Sit Rope Access Harness 216501

The GT Sit represents a step forward in comfort for rope access workers. The harness was developed from the findings of our "SOSPESI" research program which gave us new insights on suspension trauma. The innovative connection between the waist belt and leg loops makes the GT Sit comfortable both during suspension and on the ground. The padding uses variable thicknesses and stiffness to provide the right amount of support and comfort for every part of the body.

Patented ventral attachment features two loops: the upper loop is for attaching a chest harness and chest ascender and the lower loop holds the ventral D-ring for attaching lanyards and rope tools.

Patented STS automatic buckles on the leg loops.

3 aluminum alloy attachment points: 1 ventral for suspension and 2 side for positioning and restraint. Webbing loop for restraint on the back. Designed for use in combination with the GT Chest (ref.216601), with front and back connection points, to make a full body fall arrest harness.

Size	Waist (cm)	Thigh (cm)
S-L	80-120	50-65
