Description

CAMP GT Turbo Harness 2780

The GT Turbo combines the comfort and support of our innovative GT Sit + Chest harnesses with the most streamlined integration of our popular Turbo Chest ascender.

The ergonomics of the harness follow the findings of our “SOSPESI” research program which gave us new insights on suspension trauma. Combined with the proprietary Turbo Chest ascender that features patented rollers to improve upward efficiency and reduce wear-and-tear, the GT Turbo is the most technically advanced rope access harness ever conceived.

Turbochest ascender is easily detachable and replaceable. Patented STS automatic buckles on the leg loops.

5 aluminum alloy attachment points: 1 ventral for suspension, 2 side for positioning and restraint, 1 sternal and 1 dorsal for fall arrest.

Webbing loop for restraint on the back.

Size	Waist (cm)	Thigh (cm)	Harness Height (cm)
S-L	80-120	50-65	55-75
