

ECO-CLEAN UDC 500 Mobile Waste Treatment Station

Code: C3896

\$4,985.95 +GST \$5,733.84 incl. GST

Description

ECO-CLEAN UDC500 Mobile Waste Treatment Station

Available in two models as follows:

UDC-500 – Suitable for 1-5 Contractors as a mobile treatment plant

UDC-1000 – Suitable for 5+ Contractors as either an on-site unit or back at base

Waste Treatment Plants have become mandatory on job-sites in some areas of New Zealand due to newly introduced council by-laws. It is extremely likely other councils will follow suit meaning a waste treatment plant will be a necessity.

These units provide a compliant solution with very low on-going consumable costs

About the UDC-500:

A mobile cleaning station that provides contractors with an economical and compliant on-site cleaning facility.

Designed for the easy cleaning of paint brushes, rollers, trays and painting tools.

Removes the paint solids from the wash up water by using Uni-Coag powder. The water is then filtered back into the holding tank and can be recycled several times.

Product Specification
