

Festool CTM26E M Class Vacuum Dust Extractor

Brand: Festool
Code: C2106-M

\$1,362.80 +GST \$1,567.22 incl. GST

Description

Festool CTM26E M Class Vacuum Dust Extractor

The new CTM26 incorporates increased capacity, innovation and versatility into this new design. With the dual mode power activation, the user chooses either a tool activated or manual activated start-up. This CT (Cleantec) unit is extremely mobile, with a sturdy chassis, extra-large low abrasion rear tires, and double swivel casters up front to easily negotiate any obstacle. The CTM26 dust extractor can be secured in place with a single point foot brake. The filter bags have even been redesigned to be self-cleaning. These bags inflate and deflate with the cycling of the unit for maximum suction force and efficiency. An integrated hose garage has been added for easy hose storage. As with all Festool dust extractors, the CTM26 utilizes the Sys-Dock system that facilitates the use/storage of one or more Systainers to the top of the unit. Will work wet or dry with no complex conversion, and is remarkably quiet.

Approved for dusts in dust class M.

Product comes with a 12 month warranty which can be extended to 3 years if registered with Festool.

Specifications

Power consumption	350-1200W
Airflow max	3900 L/Minute
