The NEW Starmix iPulse-Series Dust Extractor has been specially developed for hard and heavy-duty continuous use in industry, in the workshop and on the construction site.

The patented intelligent permanent filter cleaning system iPulse sets this machine apart in effective performance.

DDM Pressure Difference Control (Intelligent)

- Precisely accurate, timely filter cleaning as and when required
- Filter overload is avoided, thus achieving a much better cleaning result
- The vibrating unit is not activated unnecessarily

300g Cleaning Power (Powerful)

- Filter cleaning within only 3.5 seconds per filter
- Thanks to the effective force of 300g, even the most stubborn dust is removed
- Significantly reduced noise

Constantly High Air Flow (Effective)

- Permanent Clean technology allows for cleaning during operation - which saves time and money
- The air flow is not interrupted during cleaning, so no dust escapes
- Also suitable for damp dust, water and sludge

The accessories included allow the machine to be used for normal vacuuming applications, including wet use.

Features

- 35L double-walled, special-plastic-container with plain inner walls for easy cleaning
- Auto electromagnetic pulse filter cleaning with "Permanent Clean" - cleans the filters permanently during the vacuuming process - without interruption of the intake flow!
- Appliance socket with automatic ON/OFF switch
- Step-less Speed control
- Volume flow display
- Gentle start control
- Electronic after-running feature
- Water detection with sensor switch-off
- Antistatic prepared
- Carrying handle with retractable cable hook and hose take-up
- Accessory department
- Storage space e.g. for tools and accessories
- Big, strengthened wheels and guide rolls
- Flush, stable canister clips
- L-Class filtration
- 30 Month Warranty
