Festool CT Cyclone Pre-Separator CT-VA-20

Brand: Festool
Code: C2428

$692.90 +GST $796.84 incl. GST

Description

Festool CT Cyclone Pre-Separator CT-VA-20

Designed for CT 26/36/48 Vacuums.

Copes with high volumes of dust. Efficient, simple and reliable.

High volumes of dust, shavings and chips are no longer a problem for neither the main filter, nor for the suction power. The pre-separator (compatible with Festool CT mobile dust extractors) collects up to 95% of dust before it reaches the mobile dust extractor. This reduces the load on the main filter and ensures consistently high suction power throughout the work process.

- Copes with high volumes of generated dust thanks to cyclone technology
- Consistently high suction power as a result of reducing the load on the main filter
- Easy and safe to transport thanks to a stackable collection container with compact dimensions and a sturdy design
- Work flexibly in every application with and without CT pre-separator

- for combining with all Festool CT 26/36/48 dust extractors with and without the Autoclean function
- approved for dust categories L and M
- optimum use with machines and applications with high levels of dust

Main applications
