Description

Festool Protector RTS 80x133

Sanding all the way to the edge.

The protector serves to protect the sanding pad and the workpiece. Especially when sanding close to the edge, the protector offers protection against damage directly at the edge of the workpiece, thus avoiding laborious reworking. The pad itself is also protected thanks to the protector and the service life is thus extended.

- for smooth sanding along window panes, frames and panelling
- for protecting the sanding pad and workpiece with minimal edge distance
